

U-LINE

ALL ABOUT ICE

STEP ONE

SELECT A BRAND WITH LEGACY

U-Line, a trusted industry leader, introduced the first undercounter residential ice maker in 1962. With decades of experience, U-Line sets the standard for excellence by offering reliable, efficient, and elevated solutions that incorporate advanced technology and innovative design, complementing modern lifestyles and enhancing beverage experiences at home.

STEP TWO

EVALUATE YOUR ICE NEEDS

Start your search for the perfect ice machine by evaluating your daily ice needs based on household size and hosting frequency. Consider your ice type preferences, whether it's crescent shapes for everyday beverages, crystal-clear cubes for spirits, or nugget ice for soft drinks, to find the best fit for your lifestyle.

STEP THREE

CONSIDER YOUR SPACE

When choosing the ideal ice machine, envision its placement in your space, taking into consideration sound. Measure the space to ensure a perfect fit. Ensure the space offers easy access to water, drain lines, and electricity, as these factors are crucial for function.

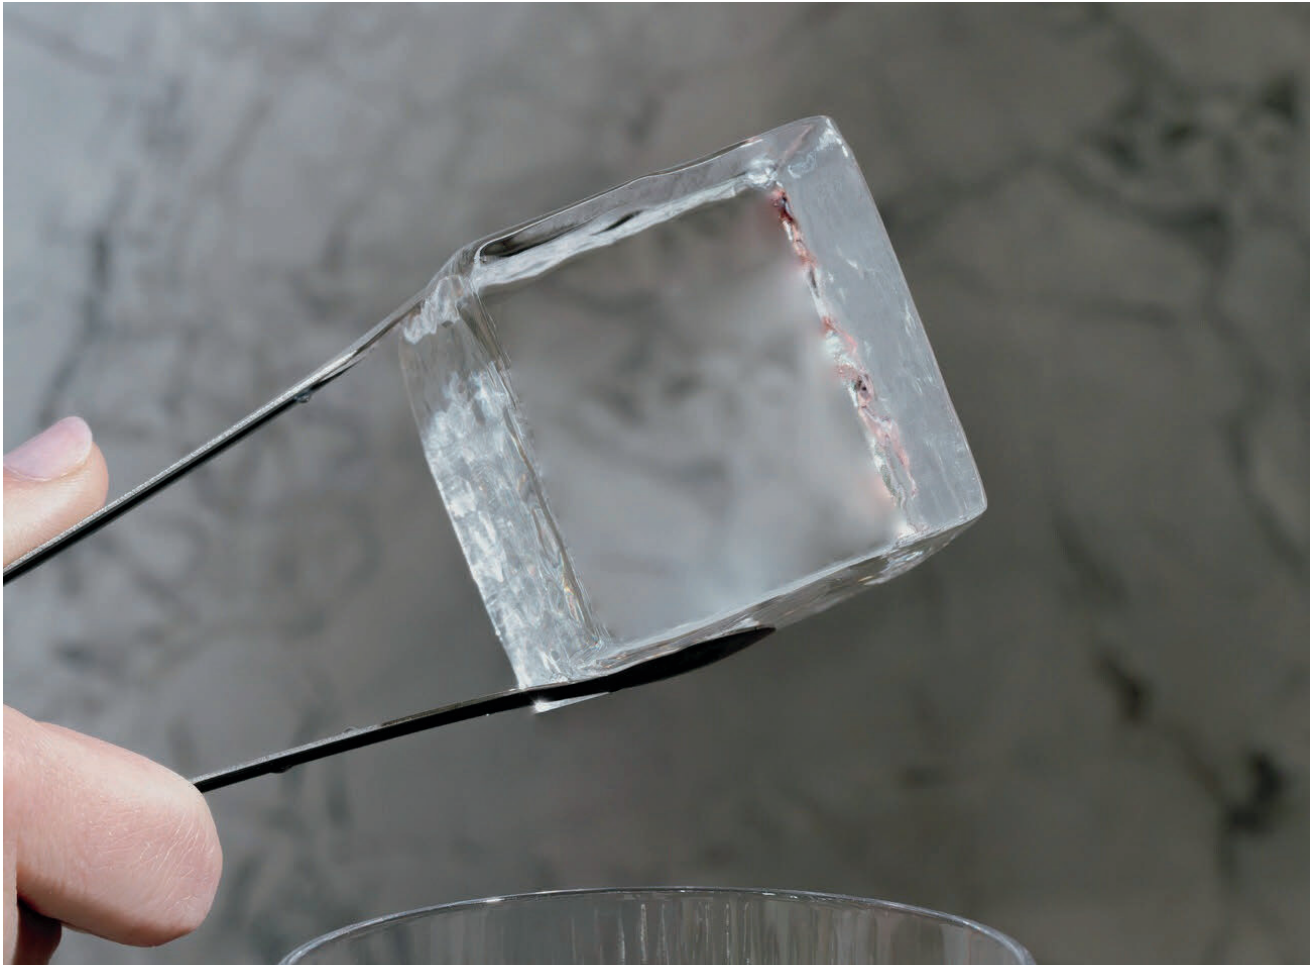

NUGGET

Our nugget ice machines freeze water in a cylindrical shape, using a rotating vertical auger to create ice shavings. These shavings are compacted into nugget shapes and pushed into an ice bin, which acts as a cooler, keeping them separated and easy to serve. Nugget ice is prized for its chewable, crunchy texture, and this machine allows you to enjoy it right at home.

- Produces up to 65 lbs of ice per day.
- Stores 27 lbs of ice.
- Creates 1/2" x 3/8" x 5/8" nuggets.
- Virtually Silent Operation.
- 20 minute clean cycle.
- Antimicrobial lighting.
- Panel-ready finish, stainless steel accessory panel available.
- Drain Required.
- Includes factory installed 32 ounce drain pump that runs less often resulting in quieter operation.

CRAFT CLEAR

INDUSTRY EXCLUSIVE

U-Line's industry-first craft clear ice machines are meticulously designed to produce long-lasting, beautiful large format clear ice cubes, reminiscent of those hand-chiseled from blocks of clear ice at luxury cocktail bars.

U-Line craft clear ice is created by gradually freezing incoming water, eliminating impurities and air bubbles. This process forms a flawless ice slab that glides onto a wire grid, that slices into the perfect shape. Unlike traditional ice cubes, this purity guarantees that your ice won't impart any off-flavors to your drink, letting the true character of your whiskey or spirit shine through.

- Produces up to 160 slow-melting cubes per day.
- Creates ~ 2" x 2" x 1 1/4" clear cubes.
- BrightShield® antimicrobial lighting.
- Articulating soft-close hinges for optimal built-in integration.
- 45 minute clean cycle.
- 3 hour silent mode.
- Sabbath mode.
- Drain Required.
- Includes factory installed 32 ounce drain pump that runs less often resulting in quieter operation.

CLEAR

Equipped with the ability to tailor your ice fullness, these models revolutionize beverage preparation by offering ice that preserves the integrity of your drinks. Our clear ice machines freeze water in layers, discarding impurities. A sheet of ice is released and divided into 32 cubes when it hits the bin. The ice bin functions as a cooler rather than a freezer, ensuring the ice remains clear and never freezes together, allowing you to enjoy restaurant-quality ice anytime.

- U-Choose® ice cube thickness adjustability.
- Produces up to 55 lbs of ice per day.
- Stores 25 lbs of ice.
- Creates 7/8" x 7/8" x 7/8" clear cubes.
- BrightShield® antimicrobial lighting on select models.
- 3 hour silent mode.
- Sabbath mode.
- Drain Required.
- Includes factory installed 32 ounce drain pump that runs less often resulting in quieter operation.

CRESCENT

Crescent ice, known for its distinctive half-moon shape, maximizes surface area to cool drinks more efficiently. These machines use the tried and true process of freezing water into ice that automatically releases into a bucket. The ice stays frozen, and only makes more when the product senses the ice bucket is low. Discover the reliability of our crescent ice makers with proven consistent performance and efficiency.

- Uses 3 gallons of water to produce 25 lbs of ice.
- Stores 25 lbs of ice.
- Creates $\frac{1}{2}$ " x $\frac{3}{4}$ " x $2\frac{1}{4}$ " crescent shaped cubes.
- No drain required.
- Manual defrost freezer.
